

# Caspio Bridge online™

## Custom Web Applications Without Programming

Imagine creating web applications and database-driven forms without writing a single line of code. Minutes later, you deploy your new applications anywhere, on any web site, hosted on any server.

### Launch in Days Instead of Months

Caspio Bridge is an all-in-one platform to build, deploy and manage custom web database applications. You don't need any advanced technical skills or any programming knowledge. Just use the Caspio Bridge point-and-click wizards to build complex web applications with sophisticated database features. You get faster, more reliable, far less expensive results without taxing your valuable engineering and IT resources.

### Caspio Bridge is:

#### Complete

Caspio Bridge includes all the tools you need to create and deploy your database applications and forms. No additional hardware or software is required. We integrate a highly scalable, industry-standard database with intuitive wizards that guide you through every step as you design your web applications. Deploy them instantly on any web site anywhere.

#### Customizable

You're not limited to "cookie-cutter" solutions. Use Caspio Bridge to customize every aspect of your web applications as you build them, and then update them on the fly as your needs change. Caspio Bridge step-by-step wizards turn application development into a creative process. Design highly-customized web applications, each with their own styling, localization, end user authentication and email alerts. Caspio Bridge web applications integrate seamlessly with the look and feel of your existing web sites.

#### Affordable

Caspio Bridge provides the most cost-efficient platform for building reliable and scalable web applications with the least amount of overhead. You don't spend any money on development, QA resources, software licenses, hardware acquisition, maintenance, monitoring, or modifying your applications in the future.

*Caspio Bridge web applications give you a competitive edge by accelerating your time-to-market so you can react faster to changing business requirements.*

*"My application would have taken months. With Caspio Bridge, I had it up and running in days."*

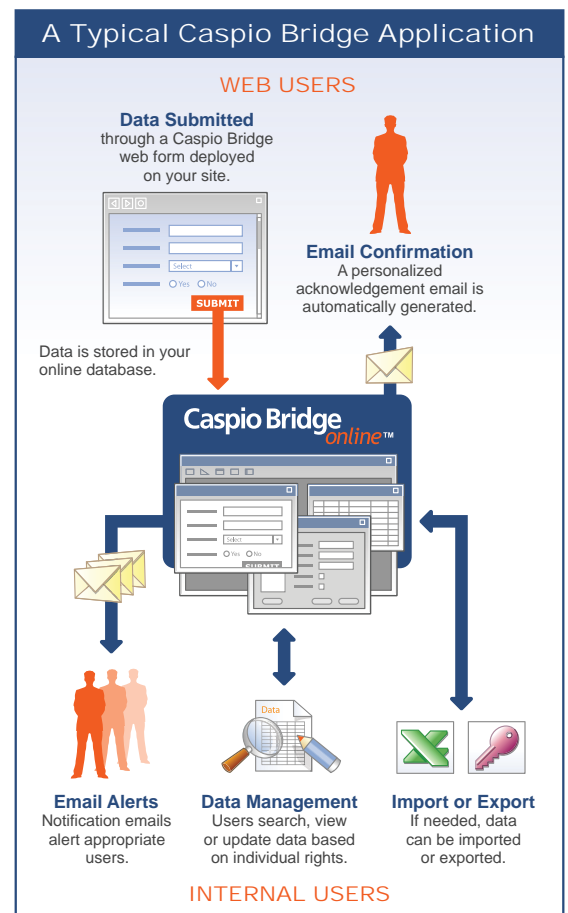

Garry Wallace, Technology Manager, Whirlpool Corp.

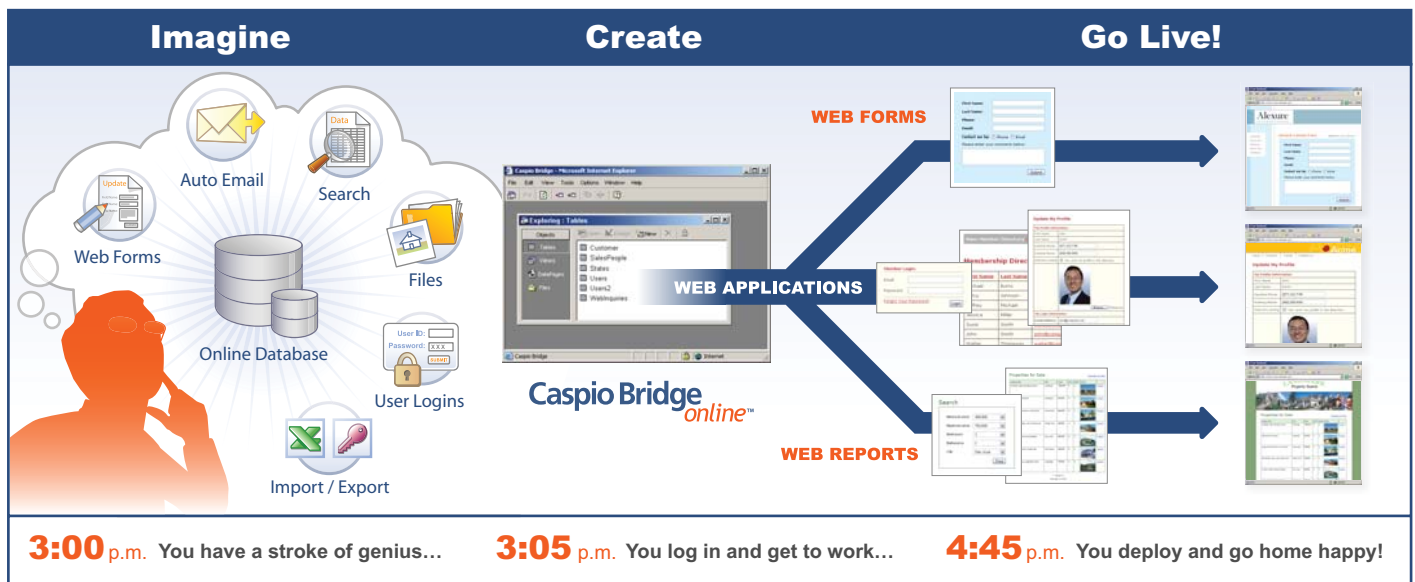

*"I tried numerous development tools, but only Caspio Bridge allowed me to automate process across 150 remote locations in just 2 days."*

Andrew Richards, Network Engineer, Invensys

*"I can make real-time changes to my live application in less than 5 minutes!"*

Adam Carey, Senior Manager, Ziff-Davis

## Feature Highlights

<b>No Programming</b>	Why hand-craft code one line at a time when you can create your applications fast with step-by-step wizards? Caspio Bridge significantly drops engineering costs and shrinks development time.
<b>Web User Authentication</b>	Control access to your applications while automating user registration, logins, profile management, and recovery of lost passwords.
<b>Record Level Security</b>	Set up your applications with record level security to limit each user to view or edit only those records authorized for them.
<b>Unlimited End Users</b>	No per-user fees! Our pricing is based on the number of applications, total storage and data transfer – not the number of end users.
<b>Customizable Email Alerts</b>	Fully customizable automatic emails are perfect for confirmation messages, internal alerts, ticketing systems, and more.
<b>Data Import and Export</b>	Import or export data on-demand in variety of popular file formats.
<b>Application Integration</b>	Relational DataPages and Web Services let you easily enhance your application's capabilities and interact with other applications.
<b>Application Localization</b>	You can customize your applications for any region and country, with extensive data formatting options and complete language localization.
<b>Rich Application Design</b>	Easy-to-use wizards give your application a fantastic layout and design. Apply one of the professionally-designed styles, or create your own using our cutting-edge CSS-compatible styling wizard.
<b>File and Image Management</b>	Complete support for file upload and flexible options to display files and images back to users through your web applications. We store all files in the database for maximum security.
<b>Mobile Device Support</b>	Create forms for mobile phones and devices in minutes using an easy-to-use Caspio Bridge wizard.
<b>Plug-in for Microsoft Office</b>	Access your Caspio Bridge data with your Microsoft Office software.
<b>Seamless Integration</b>	Applications integrate with your web site pages, navigation and graphics seamlessly. All web sites, hosted anywhere are supported!

## Product Offerings

Caspio Bridge is offered as an on-demand service in a variety of packages and delivery models.

### Small Business

Month-to-month service for SMBs requiring a fast and secure platform for internal and external-facing applications.

### Enterprise

High-touch services and scalable multi-account system for medium-to-large customers to distribute individual Caspio Bridge accounts to employees, workgroups and divisions.

### Custom Options

Caspio also offers custom solutions for dedicated environments and in-house installations.

Caspio, Inc. is the world's leading on-demand do-it-yourself web application creation platform. The company's philosophy is to empower business users to create and deploy web databases, forms, and applications easily and without programming. Caspio's on-demand platform replaces coding with intuitive point-and-click wizards, enabling users to rapidly produce web database components for capturing, publishing, and managing data online. Caspio shrinks development time from weeks to hours and from thousands of dollars to a small monthly fee. Caspio's customers range from one-person entrepreneurs to Fortune-500 corporations, digital media giants, government agencies, and educational institutions.
